

GLOBAL REPORTING INITIATIVE CONTENT INDEX

This index represents our assessment (Yes/Partial/No) of whether the Anglo American plc Report to Society 2004 and other public reports such as our Annual Report 2004 and Annual Review 2004 address the criteria set down in the 2002 GRI Sustainability Reporting Guidelines (www.globalreporting.org) for core performance indicators. Page references are to the Report to Society 2004 *Creating Enduring Value* unless otherwise indicated. We have also recorded whether we address the GRI's additional performance indicators (*) where appropriate. Where it is not deemed material to collate and manage data centrally a case study approach is used to illustrate our approach to issues.

Key policies are reported fully in the year of their adoption and thereafter are referred to in performance reports and case studies and are available on our website, <http://www.angloamerican.co.uk/> and internal websites. Core to our sustainable development work is our statement of our business principles *Good Citizenship: Our Business Principles* and our HIV and AIDS policies. The business principles are applicable to all operations.

As a member of the International Council on Mining and Metals, Anglo American was party to the negotiation of a GRI mining and metals supplement, against which we will report more fully in the future. As indicated in the body of our report we have used the GRI boundary protocol in defining the boundaries of this report.

In summary this report includes all the wholly-owned subsidiaries within the Group and is increasingly including those independently-managed operations in which we have a majority share, specifically AngloGold Ashanti and Tongaat-Hulett. We are progressively increasing the reporting of this data as systems and definitions can be aligned. To aid the reader, each mention specifically states the inclusion or exclusion of data for those subsidiaries, e.g. Trainees page 25 and contribution by business unit to Corporate Social Investment on page 33.
