

**2. Specific questions:**

No.	I. Company Name	II. Managing Company	III. Business Unit	IV. Shareholders	V. Country	VI. Operation	1. "Tailings Facility" Name/identifier	2. Location	3. Ownership	4. Status	5. Date of initial operation	6. Is the Dam currently operated or closed as per currently approved design?
Anglo American Managed Operations												
42	Anglo American	Anglo American	Nickel	Anglo American	Brazil	Codemin	Codemin: Dust Reservoir Nº 2	Latitude: 14°08'50" S Longitude: 48°20'31" W	Owned and Operated	Active.	1982	Yes

7. Raising method	8. Current Maximum Height (m)	9. Current Tailings Storage Impoundment Volume (m <sup>3</sup> )	10. Planned Tailings Storage Impoundment Volume in 5 years time (m <sup>3</sup> )	11. Most recent Independent Expert Review	12. Do you have full and complete relevant engineering records including design, construction, operation, maintenance and/or closure.	13. What is your hazard categorisation of this facility, based on consequence of failure?	14. What guideline do you follow for the classification system?	15. Has this facility, at any point in its history, failed to be confirmed or certified as stable, or experienced notable stability concerns, as identified by an independent engineer (even if later certified as stable by the same or a different firm).	16. Do you have internal/in house engineering specialist oversight of this facility? Or do you have external engineering support for this purpose?
Other, See Q20 for more information	10.4	128,596	~130,000 (See Q. 20)	2018, See Q20 for more information	Yes.	Low	National Dams Security Policy: law N° 12.334/2010.	No.	Yes. Internal geologist-geotechnical expert. External support from a geotechnical consultant when necessary.

17. Has a formal analysis of the downstream impact on communities, ecosystems and critical infrastructure in the event of catastrophic failure been undertaken and to reflect final conditions? If so, when did this assessment take place?	18. Is there a) a closure plan in place for this dam, and b) does it include long term monitoring?	19. Have you, or do you plan to assess your tailings facilities against the impact of more regular extreme weather events as a result of climate change, e.g. over the next two years?	20. Any other relevant information and supporting documentation. Please state if you have omitted any other exposure to tailings facilities through any joint ventures you may have.
No. It does not apply because the risk is low and there is no downstream community.	There is a closure plan for the industrial plant, which includes the reservoirs. The dust from the pond will be processed.	No, See Q20 for additional information	<p>Q6: The volume remains approximately constant due to the cyclical production process. The material is reused, so there is no gain or loss of volume.</p> <p>Q7: Not applicable (no dam raising). Embankment type.</p> <p>Q11: Technical memo by external engineering firm, Anglo American internal specialists also visited the site and facilities in 2017.</p> <p>Q17: There is no community downstream of the facility and hazard category is low.</p> <p>Q18: There is a closure plan for the industrial plant, which includes the reservoirs. The dust from the pond will be processed.</p> <p>Q19: Not performed as yet, but Anglo American long term Sustainable Mining Plan requires this to be done for all managed sites within the next 2 years.</p>
