

**2. Specific questions:**

No.	I. Company Name	II. Managing Company	III. Business Unit	IV. Shareholders	V. Country	VI. Operation
Anglo American Managed Operations						
36	Anglo American	Anglo American	Copper	Anglo American; Inversiones Mineras Becrux SpA (Codelco/Mitsui); Mitsubishi	Chile	El Soldado

1. "Tailings Facility" Name/identifier	2. Location	3. Ownership	4. Status	5. Date of initial operation	6. Is the Dam currently operated or closed as per currently approved design?
Dam No. 3	Latitude: 32°40'10" S Longitude: 71° 8'39" W	Operated by Anglo American for JV partners	Inactive	c. 1965	Yes

7. Raising method	8. Current Maximum Height (m)	9. Current Tailings Storage Impoundment Volume (m <sup>3</sup> )	10. Planned Tailings Storage Impoundment Volume in 5 years time (m <sup>3</sup> )	11. Most recent Independent Expert Review	12. Do you have full and complete relevant engineering records including design, construction, operation, maintenance and/or closure.	13. What is your hazard categorisation of this facility, based on consequence of failure?	14. What guideline do you follow for the classification system?	15. Has this facility, at any point in its history, failed to be confirmed or certified as stable, or experienced notable stability concerns, as identified by an independent engineer (even if later certified as stable by the same or a different	16. Do you have internal/in house engineering specialist oversight of this facility? Or do you have external engineering support for this purpose?	17. Has a formal analysis of the downstream impact on communities, ecosystems and critical infrastructure in the event of catastrophic failure been undertaken
Downstream	20	1.0 M	1.0 M	2017, See Q20 for more information	No	Moderate	Anglo American Technical Standard (AA TS 602 001)	No	Yes - In house engineering specialist. On demand support from external engineer.	No

18. Is there a) a closure plan in place for this dam, and b) does it include long term monitoring?	19. Have you, or do you plan to assess your tailings facilities against the impact of more regular extreme weather events as a result of climate change, e.g. over the next two years?	20. Any other relevant information and supporting documentation. Please state if you have omitted any other exposure to tailings facilities through any joint ventures you may have.
No	Yes, See Q20 for additional information	<p>Q1: This facility has not been operated since 1970 and no longer retains liquid or slurry and is hence classified as a "landform".</p> <p>Q11: External engineering firm.</p> <p>Q18: The surface has been re-vegetated including with mature trees in accordance with the closure practices required at the time operations ceased, although no formal closure plan exists.</p> <p>Q19: Not performed as yet, but Anglo American long term Sustainable Mining Plan requires this to be done for all managed sites within the next 2 years.</p>
