

2. Specific questions:

No.	I. Company Name	II. Managing Company	III. Business Unit	IV. Shareholders	V. Country	VI. Operation
Anglo American Managed Operations						
39	Anglo American	Anglo American	Copper	Anglo American; Inversiones Mineras Becrux SpA (Codelco/Mitsui); Mitsubishi	Chile	Chagres

1. "Tailings Facility" Name/identifier	2. Location	3. Ownership	4. Status	5. Date of initial operation	6. Is the Dam currently operated or closed as per currently approved design?
Chagres Slag Heap	Latitude: 32°48'10" S Longitude: 70°57'18" W	Operated by Anglo American for JV partners	Active	Before 1960	Yes

7. Raising method	8. Current Maximum Height (m)	9. Current Tailings Storage Impoundment Volume (m ³)	10. Planned Tailings Storage Impoundment Volume in 5 years time (m ³)	11. Most recent Independent Expert Review	12. Do you have full and complete relevant engineering records including design, construction, operation, maintenance and/or closure.	13. What is your hazard categorisation of this facility, based on consequence of failure?	14. What guideline do you follow for the classification system?	15. Has this facility, at any point in its history, failed to be confirmed or certified as stable, or experienced notable stability concerns, as identified by an independent engineer (even if later certified as stable by the same or a different	16. Do you have internal/in house engineering specialist oversight of this facility? Or do you have external engineering support for this purpose?	17. Has a formal analysis of the downstream impact on communities, ecosystems and critical infrastructure in the event of catastrophic failure been undertaken
Dry Stack	25	861,435	1,0 M	2018, See Q20 for more information	Yes	Minor	Anglo American Technical Standard (AA TS 602 001)	No	Yes. Internal Specialis. On demand support from external engineer.	No, See Q20 for additional information

18. Is there a) a closure plan in place for this dam, and b) does it include long term monitoring?	19. Have you, or do you plan to assess your tailings facilities against the impact of more regular extreme weather events as a result of climate change, e.g. over the next two years?	20. Any other relevant information and supporting documentation. Please state if you have omitted any other exposure to tailings facilities through any joint ventures you may have.
Yes (conceptual level), Yes	No, See Q20 for additional information	<p>Q1: The Chagres slag heap is a deposit of vitreous material, with no water content. It occupies an area of 9.9 hectares and has full sectorial and environmental permits.</p> <p>Q10: The capacity of the heap varies in accordance with deposition rates & removal activities, including sales to 3rd parties or for use in the flotation plant at el Soldado, when required. Every year, topographical control and stability analyses are performed for the heap.</p> <p>Q11: External engineering firm.</p> <p>Q17: Given its proximity to the plant and the Aconcagua river, flood defence systems are in place to protect the deposit from eventual floods. These structures have been approved by the General Water Authority.</p> <p>Q19: Not performed as yet, but Anglo American long term Sustainable Mining Plan requires this to be done for all managed sites within the next 2 years.</p>
