

2. Specific questions:

No.	I. Company Name	II. Managing Company	III. Business Unit	IV. Shareholders	V. Country	VI. Operation
Anglo American Managed Operations						
44	Anglo American	Anglo American	Nickel	Anglo American	Brazil	Codemin

1. "Tailings Facility" Name/identifier	2. Location	3. Ownership	4. Status	5. Date of initial operation	6. Is the Dam currently operated or closed as per currently approved design?
Codemin: Slag Pile No. 1	Latitude: 14°09'04"S Longitude: 48°20'44"W	Owned and Operated	Inactive	1975	No, See Q20 for more information

7. Raising method	8. Current Maximum Height (m)	9. Current Tailings Storage Impoundment Volume (m ³)	10. Planned Tailings Storage Impoundment Volume in 5 years time (m ³)	11. Most recent Independent Expert Review	12. Do you have full and complete relevant engineering records including design, construction, operation, maintenance and/or closure.	13. What is your hazard categorisation of this facility, based on consequence of failure?	14. What guideline do you follow for the classification system?	15. Has this facility, at any point in its history, failed to be confirmed or certified as stable, or experienced notable stability concerns, as identified by an independent engineer (even if later certified as stable by the same or a different	16. Do you have internal/in house engineering specialist oversight of this facility? Or do you have external engineering support for this purpose?	17. Has a formal analysis of the downstream impact on communities, ecosystems and critical infrastructure in the event of catastrophic failure been undertaken
Dry Stack	45	3.5M	0	2017, See Q20 for more information	No	Moderate	Anglo American Technical Standard (AA TS 602 001)	No.	Yes. Internal geologist-geotechnical expert. External support from a geotechnical consultant when necessary.	No. See Q20 for additional information

18. Is there a) a closure plan in place for this dam, and b) does it include long term monitoring?	19. Have you, or do you plan to assess your tailings facilities against the impact of more regular extreme weather events as a result of climate change, e.g. over the next two years?	20. Any other relevant information and supporting documentation. Please state if you have omitted any other exposure to tailings facilities through any joint ventures you may have.
Yes	Yes, See Q20 for additional information	<p>Q1: This facility is a slag pile, with no engineering design, only a defined layout and maximum height.</p> <p>Q6: With regard to the deviation from design, there is some deviation from the design footprint.</p> <p>Q11: Anglo American Head of MRF</p> <p>Q17: There is no community downstream of the facility and the hazard category is low.</p> <p>Q19: Not performed as yet, but Anglo American long term Sustainable Mining Plan requires this to be done for all managed sites within the next 2 years.</p>
