2. Specific questions:

No.	I. Company Name	II. Managing Company	III. Business Unit	IV. Shareholders	V. Country	VI. Operation
Anglo Americ	an Managed Operations					
I/X		Anglo Coal (Dawson Management) Pty Ltd		Anglo Coal (Dawson) Ltd; Mitsui Moura Investment Pty Ltd	Australia	Dawson

1. "Tailings Facility" Name/identifier	2. Location	3. Ownership		operation	6. Is the Dam currently operated or closed as per currently approved design?
Dawson Nth TSF Cell 2	24.500 S, 179.604 E	Operated by Anglo American for JV partners	Inactive	2011	No

7. Raising method	• , ,	Storage Impoundment Volume (m³)	10. Planned Tailings Storage Impoundment Volume in 5 years time (m³)	Independent Expert Review	•	13. What is your hazard categorisation of this facility, based on consequence of failure?	14. What guideline do you follow for the classification system?	its history, failed to be confirmed or certified as stable, or experienced notable stability concerns, as	this facility? Or do you have external engineering support for this purpose?	
Other, See Q20 for more information	NA	1800	Nil increase	2018	No design (see comments in Q20)	II ow / Minor	Queensland - Dept. of Env & Science/ Anglo American Technical Standard (AA TS 602 001)	No	Both	Yes, REMP 2018/2019. CCA as well as CCS completed

18. Is there a) a closure plan in place for this dam, and b) does		20. Any other relevant information and supporting documentation.
it include long term monitoring?		
Yes, Yes	No. Because the facility is disused and will be capped in next few years	Q4: Inactive, in that no tailings have been deposited in this in-pit storage since late 2013. Q6: It is planned to cap and rehab this facility in accordance with "Mineral Residue Guideline" Doc #1069_Coal_7-9 Form. This plan is in concept level however, the level of detail will be increased as the closure date becomes nearer. Q7: In Pit storage separated from Cell 2 TSF by an internal embankment Q12: No design report. However, at the time of its use, relevant operational information, like water balance model was available on Site. And the storage was regulatory compliant during its use as a tailings storage facility. Q17: Consequence classification for all the Dawson storages has been completed; using the Anglo-American's Standard AA TS 602 001.
