

**2. Specific questions:**

No.	I. Company Name	II. Managing Company	III. Business Unit	IV. Shareholders	V. Country	VI. Operation
Anglo American Managed Operations						
58	Anglo American	Anglo Operations (Pty) Ltd.	Coal SA	Anglo American	South Africa	Goedehoop

1. "Tailings Facility" Name/identifier	2. Location	3. Ownership	4. Status	5. Date of initial operation	6. Is the Dam currently operated or closed as per currently approved design?
Old Slurry Dams	26.06.16 S : 29.24.71 E	Owned and Operated	Active	1995	No

7. Raising method	8. Current Maximum Height (m)	9. Current Tailings Storage Impoundment Volume (m <sup>3</sup> )	10. Planned Tailings Storage Impoundment Volume in 5 years time (m <sup>3</sup> )	11. Most recent Independent Expert Review	12. Do you have full and complete relevant engineering records including design, construction, operation, maintenance and/or closure.	13. What is your hazard categorisation of this facility, based on consequence of failure?	14. What guideline do you follow for the classification system?	15. Has this facility, at any point in its history, failed to be confirmed or certified as stable, or experienced notable stability concerns, as identified by an independent engineer (even if later certified as stable by the same or a different	16. Do you have internal/in house engineering specialist oversight of this facility? Or do you have external engineering support for this purpose?	17. Has a formal analysis of the downstream impact on communities, ecosystems and critical infrastructure in the event of catastrophic failure been undertaken
Downstream	6	0.13M	0.13M	2012	No	Minor	Anglo American Technical Standard (AA TS 602 001)	No	Both	No

18. Is there a) a closure plan in place for this dam, and b) does it include long term monitoring?	19. Have you, or do you plan to assess your tailings facilities against the impact of more regular extreme weather events as a result of climate change, e.g. over the next two years?	20. Any other relevant information and supporting documentation. Please state if you have omitted any other exposure to tailings facilities through any joint ventures you may have.
Yes and yes	Plan in place in line with Anglo American's Long term Sustainable Mining Plan.	Q1: 5 Contiguous slurry dams No 1 to 5 Q6:Q12: the slurry paddocks are low height, earth walled containments where fine coal slurry was deposited for a period prior to the introduction of the co-disposal facility. The dried out slurry is being progressively reclaimed which will be followed by formal closure. Q18: Closure plans are at concept level and will be developed in more detail closer to the closure date in accordance with the Anglo American process, inclusive of relevant long term monitoring.
